Video game designer

Very little people will say
I want to make a game
Definitely worth it
Entries to this game are long and hard but….
Overall I feel like it's worth it!

Games can be big or small
And easy or HARD but to….
Me every game is unique in a different way
Endless selection for one game topic to choose from but it's worth it
So games are like an endless world of possibilities

Designer design clothes but video game designer design games with….
Endless responsibilities like trouble shooting,
Squeezing games together
In one office with 800 people for backup.
Great ideas have endless possibilities
None that are creative will fall only rise
Endless possibilities for one game
Rare occasions of a game designer are great!
